

Tradecast Methodology Summary

Generated: 2026-03-29T19:49:27.189156+00:00

1. Real-time market data, news, earnings, macro, sentiment, and insider disclosures are ingested.
2. Candidates are scored for confidence, direction, risk-reward, and historical comparability.
3. Only signals clearing the confidence threshold are published with entry reference, invalidation, and target.
4. Every published signal is cryptographically committed and tracked through immutable audit logs.
5. Outcome checks and monthly digests are retained for public verification of platform track record.

This document is a product methodology summary, not personalised investment advice.

Trading involves risk of loss. Capital is at risk.
